

Team Lead Full-Stack Developer

kobtsev.info@gmail.com

Bangkok, Thailand

Michael Kobtsev

Profile

Hello, my name is Michael, I'm **24 years** old **Full-Stack Developer with 6+ years of commercial experience**.

I specialize in creating of **Web applications with AI Back-Ends** that are hosted and scaled using modern cloud providers and latest stack of technologies.

My goal is to become System Architect one day, now I'm **looking for new experience** and interesting projects to reach this target, hope we will have an opportunity to work together in future.

Education

Computer Science Bachelor's Degree, Novosibirsk State University

09/2019-06/2023

Employment History

React, Python Full-Stack developer / Team Lead at Bushfire AI

02/2023-Present

About project: AI-based fire detection system that works with live 360 degrees cameras. Web contains view for each active camera, detection list and large admin panel for elastic configuration of each camera unit.

My role: Tech Lead and Team Lead of the project. I was setting up full infrastructure, communicating with the client, hiring and introducing new developers, performing management of the team.

Technologies:

- React
- · Python Back-End
- GraphQL
- DynamoDB
- Docker
- AWS (Amplify / Cognito / S3 / Lambda / EC2 / SQS / SES / CloudWatch)

Portfolio GitHub GitLab

Courses

Full-Stack Python developer at Skill-Factory 02/2018—02/2019

Skills

TypeScript (React / Angular)	5/5
Node (Nest / Express)	4/5
Python (Fast API / Flask / Django)	4/5
Git (GitHub / GitLab / BitBucket)	5/5
DevOps (Docker / Nginx / CI & CD)	4/5
Cloud (AWS / Azure)	5/5
Team Management	4/5

Angular Front-End developer / Team Lead at Workpack AI

06/2022-Present

About project: AI web tool for architects to perform takeoffs much faster. The project can be described as AutoCAD in browser with automatic AI detection of measures and different abilities for summaries/exports across document.

My role: Lead of the Front-End team. I took part in development since the project start and introduced a lot of core features from Front-End side. Some of interesting tasks were geometry shapes editor, AI inference on UI, performance and memory optimizations for heavy documents.

Technologies:

- Angular
- PDFTron
- OpenCV / ONNX Runtime
- · Azure App Insights
- Azure DevOps

Node, AWS cloud developer / Tech Lead at AI Diagnostics

03/2021-03/2022

About project: Medical project for AI analysis of data collected from stethoscopes. Our team developed desktop application with auto-update functional and cloud synchronization. System allows to securely access and share information collected at different hospitals.

My role: AWS cloud infrastructure, Back-End for storing and synchronization of incoming data.

Technologies:

- Nest
- PostreSQL
- AWS (Amplify / Cognito / S3 / Lambda / CloudWatch)

React, Node Full-Stack developer at Firststep AI

08/2020-02/2023

About project: No code platform for training of AI models (Object Classification, Object Detection and Object Segmentation). Web system allows user to upload dataset, choose base model, set augmentation list and other additional configuration. After training each model can be tested and downloaded as an Android application or as a RAW file.

My role: Layout of core system pages, dataset upload and AI model training logic, authentication system, subscriptions system, E2E debugging, AI team support, setting up some parts of cloud infrastructure on AWS.

Technologies:

- React
- Express

- PostgreSQL
- AWS (Amplify / Cognito / S3 / Lambda / RDS / EC2 / SES / CloudWatch)
