PROFILE

Full-stack engineer, **7+ years**, Team/Tech Lead experience. Since 2021 at **Businessware Technologies** (AI software development): AI-powered client products end to end — web, mobile, backend, cloud and payments. Main stack: **Python** (Django, FastAPI) and **TypeScript** (React, NestJS) on PostgreSQL. Recent focus: **LLM agents and tools** (OpenAI Agents SDK, MCP, RAG) and **AI cost control**. AI-first workflow (Claude Code, Cursor). Remote with international teams, in English.

EXPERIENCE

Senior Full-Stack Engineer · Team Lead · Businessware Technologies 03/2021 — present

AI software development company (since 2003): AI agents, document AI and SaaS products for international clients. I work on long-term client projects, usually two in parallel, as an engineer, Team Lead or Tech Lead.

InQI · **Senior Full-Stack Engineer** 06/2025 — present

- Designed the **AI spend-control system**: per-run USD cost accounting by model, plan limits, credit pools, kill-switch on paid calls.
- Developed the **AI assistant** (OpenAI Agents SDK, SSE, MCP tools and OCR on AWS Lambda, Terraform).
- Built **Stripe** subscriptions and AI credits; shipped **60+ iOS/Android releases** (Expo); Docker deploys with auto-rollback.

Python, Django / DRF, Flask, React, TypeScript, ArcGIS JS, React Native / Expo, PostgreSQL / PostGIS, OpenAI Agents SDK, MCP, Stripe, AWS (ECS, Lambda, S3, CloudWatch), Terraform, Docker, GitHub Actions

Bushfire AI · **Team Lead / Tech Lead, Full-Stack (React, Python)** 02/2023 — 06/2025

- Led the team: hiring, onboarding, planning, client communication, production health.
- Main web-app contributor: camera views, detections, admin panel (React, GraphQL / AppSync).
- Serverless backend and Docker inference service on AWS; wrote the E2E test suite.

React, TypeScript, GraphQL (AppSync), Python, DynamoDB, AWS (Lambda, Cognito, S3, SES, CodeDeploy), Docker

Destini Takeoff · **Front-End Team Lead (Angular)** 06/2022 — 06/2025

- Led the front-end team; top web-app contributor.
- Geometry editor and PDF workflows; YOLO model in the browser (ONNX Runtime Web, OpenCV.js).

Angular, TypeScript, PDFTron, ONNX Runtime Web, OpenCV.js, Konva, Azure DevOps, App Insights

- ADS Newspapers · **Senior Python / DevOps Engineer** 12/2025 — 03/2026 — AI ad digitization in PDF newspapers: YOLO + Gemini, FastAPI, GCP.
- AI projects for other clients · **Full-Stack / AI Engineer** 2024 — present — LLM document extraction, retrieval + ranking, RAG agents, vision and speech pipelines.
- Firststep AI · **Full-Stack Developer (React, Node.js)** 03/2021 — 02/2023 — No-code CV training platform: UI, dataset and training flows, auth, subscriptions.
- AI Diagnostics · **Tech Lead (Node.js, AWS)** 06/2021 — 05/2022 — Medical device cloud: Node.js backend, sync and updates on AWS.

EARLIER EXPERIENCE

- **Front-End Developer** · Integral Commodities 06/2020 — 02/2021 — product and price search for a commodities exporter: Next.js, Google Maps, Docker, Jenkins.
- **Full-Stack Developer** · AMDB, Institute of Cytology and Genetics 09/2019 — 05/2020 — research and experiment management service: Django, JavaScript, Docker, Nginx.

OWN PROJECTS

- Hobbio 12/2023 — 08/2026 — Own startup: Expo app (110+ store releases), NestJS, BullMQ, K8s, YooKassa.
- Reelabs 12/2025 — 08/2026 — Own startup: AI video pipeline (LLM, HeyGen, ElevenLabs, Remotion on Lambda), Telegram bot.

KEY RESULTS

- **LLM in production:** OpenAI Agents SDK, MCP tools on AWS Lambda, SSE, RAG (pgvector, Qdrant)
- **AI cost control:** per-run USD accounting, plan limits, credit pools, kill-switch
- **170+ store releases** of Expo apps (client and own)
- **Payments:** Stripe, YooKassa (54-FZ), Robokassa
- **Infra:** Docker, K8s, Terraform, AWS, CI/CD with auto-rollback
- **Team Lead** on two projects: hiring, onboarding, planning
